

Finally, Israel has entered into the ground war. We must force Israel to immediately stop this cruelty definitely enabling the country to press Palestinians oppressed by more than forty years' occupation and abuse of their human rights into a space with no escape and then kill them.

However, international voices denouncing Israel remain quite low. Most of the media see or try to understand little of what is happening now by drawing a rough sketch of Hamas' violent answer to Israel, which leads directly to no crime for Israeli occupation. However, what has created such a state as drives Israel to continue to stage a war for "self-defense" is exactly Israeli occupation, which is just the same as war in Lebanon in 2006.

The brutal sights in Gaza are seen as an extension of our hopeless daily life in Japan. The country dispatched the Self-Defense Forces to Iraq to support US occupation of Iraq and back up attack on Afghanistan through assisting fueling in the Indian Ocean. Killing a person in the pretext of war on terrorism to keep the safety or stability of the administration in the short run is being accepted as a natural sense in the world.

Enough! We cannot stand this situation or this sort of a world any longer!

Stop War and Occupation Now!

Raise voices from our society here against Israeli occupation and aggression!
